

ARGUMENTS/REMARKS

Applicants would like to thank the examiner for the telephone interview conducted on December 14, 2006. At that interview, it was pointed out to the Examiner that the amended claims specifically recite that a graphical image of the member is generated by the mobile device, and that this graphical image is used for identifying the member. It was pointed out that Fraccaroli does not teach any such feature.

Furthermore, it was pointed out that Will, cited by the Examiner for teaching the display of graphical images, is a reference directed toward stationary computers, and thus is not an art relevant to mobile devices. It was further pointed out that it would be difficult to modify a mobile device according to the stationary computer used in Will. Finally, it was pointed out that even the combination of references does not teach using a graphical image to identify a member that is in the vicinity. The Examiner agreed to review the rejections in light of this discussion.

Accordingly, the amended claims are patentable over the references, and notice to that effect is hereby requested. If it is determined that the application is not in a condition for allowance, the examiner is invited to initiate a telephone interview with the undersigned attorney to expedite prosecution of the present application.

If there are any additional fees resulting from this communication, please charge same to our Deposit Account No. 16-0820, our Order No. 33835.

Respectfully submitted,

PEARNE & GORDON, LLP
